# THE NEXT EVOLUTION IN HAIR REMOVAL IS HERE

Traditional hair removal methods such as shaving and waxing are expensive in the long run, and let's face it, the results just don't last. It's time for you to try the "bare minimum" with the Soprano Titanium. As the world's leading laser hair removal brand for over a decade, it's the premier tool for maximizing your overall hair removal experience.

#### **BARE INNOVATIONS**

Soprano Titanium's proprietary technology is called Super Hair Removal (SHR™). It delivers optimized laser energy at a very rapid rate in order to target and destroy hair follicles. Other laser hair removal options use a stamp or single-pulse technique. Soprano Titanium's unique SHR™ technology works in motion to ensure uniform coverage of the treatment area. Best of all, the amount of discomfort you'll feel will be significantly minimized.

#### **BARE VISIONARIES**

In order to treat a wider range of hair and skin types and hair depths, Soprano Titanium's 3D technology combines not just one, but THREE, of the most clinically-proven laser wavelengths. And when it comes to hair and skin type, other laser treatment options just don't have the capabilities to accommodate our diverse clientele.

## **BARE DISCOMFORT**

Soprano Titanium delivers continuous contact cooling at 4C<sup>0</sup> throughout the course of the treatment session to ensure the most comfortable experience possible.

### **BARE INVESTMENT**

Treatment time varies, depending on the size of the treatment area, but likely you can expect to invest nearly half the time of other laser hair removal options. On average, treatment sessions last about 1 to 15 minutes.

Because lasers target hair during the growth phase, you'll need more than one treatment. The total number of treatment sessions will depend on your hair type, skin type, treatment area and goals. Eventually you may want to come back for touch-ups.

Following each treatment, you can return to your regular daily activities immediately. But first, you should apply sunscreen to any areas that are directly exposed to the sun.

Ask your practitioner about

Soprano Titanium's SHR™

today, and start doing the

BARE MINIMUM for MAXIMUM

HAIR REMOVAL RESULTS.
